ASHISH ANAND

Senior Power BI Developer | BI Delivery | Power BI Service & Analytics

anand_ashish96@outlook.com| +91 9135755555 | github.com/ash15h/Power-Bi-Dashboards

---

PROFESSIONAL SUMMARY

- Power BI professional with **7+ years** of experience delivering BI and reporting solutions across Insurance, Banking, Retail and Energy.
- Hands-on across the **Power BI delivery lifecycle**, including requirements, data preparation, semantic modelling, DAX, dashboard development, testing, Power BI Service deployment, security, refresh, performance optimization and production support.
- Currently with PwC India, where I have developed and maintained **9–10 Power BI dashboards** across multiple Insurance functions and co-led delivery with a **team of 4 developers** across development, testing and production.
- Strong hands-on experience with **Power BI Desktop and Service, DAX, Power Query, BigQuery, SQL**, semantic modelling, **RLS**, workspaces, Apps, deployment and **refresh automation**.

CORE SKILLS

- **Power BI:** Power BI Desktop, Power BI Service, Power BI Apps, dashboard/report development, KPI reporting, drill-throughs, bookmarks, tooltips, conditional formatting
- **DAX & Power Query:** DAX measures, calculated columns, time intelligence, KPI calculations, Power Query, data transformation, data cleaning
- **Data Modelling:** Semantic models, star schema, snowflake schema, dimensional modelling, fact/dimension tables, relationships
- **SQL & Data Platforms:** SQL, BigQuery, data validation, data reconciliation, dashboard testing
- **Service & Administration:** Workspaces, reports/semantic models, Apps, deployment, permissions, AD groups, RLS, scheduled refresh, refresh monitoring
- **Delivery & Automation:** Requirements, stakeholders, testing, release coordination, production support, performance optimization, APIs, notebooks, data pipelines, selective refresh, JIRA, Agile
- ---

PROFESSIONAL EXPERIENCE

Senior Associate | PwC India | Gurugram | Jan 2026 – Present

- Developed and maintained **17 Power BI dashboards end-to-end**, taking full ownership of selected dashboards while contributing to others across Sales, HR, Billing & Collections, Data Quality & Governance, Movement in Inforce Book, IT Ticketing, Claims and RCU.
- Co-led Power BI delivery with a **team of 4 developers**, coordinating requirements, development, testing, deployment and issue resolution while continuing to contribute hands-on to dashboard development.
- Worked directly with **business stakeholders** to understand reporting requirements, define KPIs and translate business processes into practical Power BI reporting solutions.
- Built interactive reports using **Power BI Desktop, Power Query and DAX**, including KPI reporting, dynamic filtering, drill-throughs, bookmarks, conditional formatting and business-specific analytical views.
- Designed and maintained **semantic models** with fact and dimension structures, relationships and reusable measures across multiple Insurance functions.
- Developed **DAX measures** for operational KPIs, ageing analysis, trends, movement analysis and performance reporting.
- Used **BigQuery and SQL** for data analysis, dashboard testing and source-to-report validation, checking calculations, transformations, business rules and reconciliation against source data.
- Managed **Power BI Service** activities across **Dev, UAT and Prod**, including workspaces, report and semantic model deployment, Apps, permissions, access control and **RLS** using AD groups.
- Monitored refreshes and supported **refresh automation using APIs, notebooks and data pipelines**, including table-level and selective refresh requirements.
- **Improved report performance** by optimizing the data model and transformation layer, removing unnecessary columns, moving suitable transformations and bucketing logic to the backend, and reducing reliance on calculated columns.
- Replaced manual, function-owned reporting with centralized Power BI dashboards, **improving transparency and reducing the scope for manual alteration of reported figures** through controlled, source-validated reporting and automated refresh processes.

IT Analyst | Tata Consultancy Services (TCS) | Gurugram | Feb 2022 – Jan 2026

- Developed and maintained Power BI reporting for **Vulnerability Assessment – Safety & Soundness (VA S&S)** function, covering assessment schedules, issues, remediation tracking and operational reporting.
- Developed the **Vulnerability Assessment Issue Tracking Dashboard**, bringing assessment schedules, issues, due dates, CAPs, Risk Exceptions and Production Change Verification into a single reporting solution.
- Improved visibility across **40+ projects** by bringing assessment and issue information into Power BI, enabling stakeholders to track status, ageing, due dates, workload and remediation progress in one place.
- Developed **DAX measures** for ageing and due-date analysis and built interactive reports with filters, drill-throughs, conditional formatting and views by domain, SPOC, JIRA assignee and issue status.
- Used **SQL and BigQuery** for data preparation and validation, reconciling Power BI outputs against source data and checking business rules, filters, relationships and calculations.

- Implemented **RLS and AD groups** and managed **Power BI Service** activities including workspace configuration, report and semantic model publishing, permissions, Apps and refresh monitoring.
- Supported **15-minute refresh requirements**, investigated refresh issues and supported automation using APIs, notebooks and data pipelines, including selective table refresh.
- Reviewed DAX calculations, data models, queries and report design to **optimize Power BI reports and models**, while working directly with business and technical stakeholders on enhancements and releases.

Data Analyst | EnigmaSoft Technologies | Panjim | Mar 2021 – Feb 2022

- Developed Power BI reporting for a **UK electricity supplier**, analysing weather conditions and electricity demand and building dashboards comparing **actual vs. predicted demand**.
- **Analysed historical electricity consumption and demand data** to identify trends supporting operational planning; also contributed to analytics and chatbot initiatives.
- **Prepared and transformed reporting data** and presented operational insights through Power BI dashboards and trend analysis.

Data Analyst | Sveltetech Technologies | Gurugram | Nov 2020 – Mar 2021

- **Developed and maintained Power BI reports and dashboards**, built KPI-based visualizations and supported refresh scheduling and recurring reporting.
- **Prepared and transformed reporting data** for recurring KPI reports and supported scheduled refreshes and regular dashboard availability.

Tech Support Associate | Tech Mahindra | Noida | Nov 2018 – Mar 2020

- **Developed and maintained Power BI reports and dashboards**, built KPI-based visualizations and supported refresh scheduling and recurring reporting.
- Supported reporting requirements by **translating business data into KPI-focused Power BI views** and maintaining recurring reporting outputs.

SELECTED PROJECTS

Enterprise Insurance BI Delivery | Insurance | Power BI | BigQuery | SQL | DAX | Power BI Service | RLS

- **Enterprise reporting solution supporting multiple Insurance functions** including Sales, HR, Billing & Collections, Data Quality & Governance, Movement in Inforce Book, IT Ticketing, Claims and RCU.
- **Built and maintained semantic models, DAX measures, Power Query transformations and interactive report experiences** covering KPI analysis, ageing, trends, movement analysis and operational reporting.
- **Managed controlled reporting delivery across Dev, UAT and Prod** including workspaces, Apps, permissions, RLS and deployment of reports and semantic models.
- **Supported refresh automation, data validation and performance optimization** using BigQuery, SQL, APIs, notebooks and data pipelines.
- Improved reporting transparency by replacing manually prepared functional reports with centralized, source-driven dashboards, **reducing the ability to manually change reported figures** and giving stakeholders a more consistent view of performance and operational metrics.

Vulnerability Assessment Issue Tracking | Banking | Power BI | BigQuery | SQL | DAX | RLS

- **Centralized Power BI reporting solution for VA S&S function** covering assessment schedules, issues, remediation tracking and operational status.
- **Consolidated reporting across 40+ projects** with analysis of ageing, due dates, workload, issue status, domains, SPOCs and JIRA assignees.
- **Developed DAX-based ageing and due-date analysis** with interactive filtering, drill-throughs and conditional formatting to support issue and remediation tracking.
- **Implemented RLS and AD-group based access** and supported Power BI Service publishing, refresh monitoring and source-to-report validation using SQL and BigQuery.

CERTIFICATIONS & EDUCATION

- **Certifications:** Microsoft Certified: Power BI Data Analyst Associate (PL-300) | PwC Switzerland – Power BI Job Simulation | Forage
- **Education:** B.Tech – Computer Science & Engineering | Accurate Institute of Management and Technology, Greater Noida | 2014–2018
